Basal Bark: Liberally spray or paint the bark around the stem from ground level up to 30cm high, wetting thoroughly to the point of run-off (unless otherwise stated).

Cut Stump: Apply mixture liberally to the freshly cut stump by spraying or painting the cut surface and sides of the stem (unless otherwise stated).

MIXING INSTRUCTIONS

Quarter fill the spray unit or mixing container with Cambium and add the required amount of herbicide. Add the remaining Cambium and shake or agitate thoroughly to mix the contents. Only mix sufficient chemical for each day's work, mixing periodically.

STORAGE AND DISPOSAL

Store in original sealed container away from direct sunlight. Dispose of contents and container according to local regulations.

SAFETY AND FIRST AID

Cambium is non-hazardous but should always be handled with good agrichemical handling practices. When using with other products consult their safety directions. Avoid repeated or prolonged skin contact. Wear overalls, impervious gloves and chemical goggles. Use adequate ventilation. Avoid breathing product vapours or mists. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes do not rub. Hold eyes open, flood with water for at least 15 minutes and see a doctor. If swallowed, DO NOT induce vomiting. Give a glass of water. Contact a doctor or Poisons Information Centre. Consult SDS for more detailed information.
