Turf Production

Product Portfolio

PLANT GROWTH REGULATORS

| Product | Active Ingredient | Formulation | Product Type | Pack Size | Application Rate (see label for more detail) |
|------------------------------------|-------------------------|--------------------------|--|-----------|--|
| Amigo 120ME Plant Growth Regulator | 120g/L Trinexapac ethyl | Micro-Emulsion | Regulation of leaf and stem growth, as well as a turf management aid across a range of turfgrass species. | 1L, 5L | 1.5-20mL/100m ² |
| Amigo 175EC Plant Growth Regulator | 175g/L Trinexapac ethyl | Emulsifiable Concentrate | Regulation of leaf and stem growth, as well as a turf management aid across a range of turfgrass species. | 5L | 0.4-5.5L/ha |
| Padre 270 Plant Growth Regulator | Maleic Hydrazide | Soluble Concentrate | A vegetation management tool to reduce the growth of Bahai grass, Bahai grass seed heads and Kikuyu in low maintenance grassed & turfed areas, fencelines, industrial areas, non-crop situations, roadside, rail and rights-of-way situations. | 10L | 6-12.5L/ha |

PLANT HEALTH SOLUTIONS

| Product | Active Ingredient | Formulation | Product Type | Pack Size | Application Rate (see label for more detail) |
|---|--|--------------------------|---|-----------|--|
| BioForce MicroLife | Trichoderma, Beneficial Bacteria, Humic Acid, South African Kelp | Liquid | Will establish a strong beneficial microbial population that will colonise at the root zone to provide an improvement in the growing environment for plant roots. | 6L | 10mL/100m ² |
| Silixol Turf & Ornamental | 27g/L Ortho Silicic Acid | Aqueous Concentrate | Plant available Silicon which strengthens cell walls, improves nutrient uptake and assists in protecting the plant. | 1L | 10mL/100m ² |
| Turf Aid | Pigments, Salicylic acid, Inbuilt Adjuvant | Suspension Concentrate | Green pigment with salicylic acid included for improved resistance to plant diseases. | 1L | 10mL/100m ² |
| VapourShield Anti-Transpirant & Turf Conditioning Aid | Natural Cyclohexane Polymer | Emulsifiable Concentrate | For use in Turf Production to assist in reducing harvest stress and improve replant establishment. For use in Turf maintenance to reduce drought and heat stress and to provide a reduction in irrigation requirements. | 5L | 5-20L/ha |

SOIL SURFACTANT SOLUTIONS

| Product | Active Ingredients | Pack Size | Purpose | Rate/Ha |
|---|--|------------------|---|--|
| HydroForce Evolve Soil Penetrant Surfactant | 480g/L Alkyl Sulphate and Dimethylsiloxane | 1L | HydroForce Evolve is a true soil penetrant, consisting of an anionic soil-amending additive, which modifies surface tension of the hygroscopic (bound) water in the soil profile. The product improves water infiltration and penetration in all soil types, but particularly effective on loams and clays. | 0.75-1L |
| HydroForce Extend Soil Surfactant | 1000g/L Block Co-Polymer technology | 20L | HydroForce Extend is a long-term surfactant that gives you guaranteed safe protection against water repellency problems and promotes turf uniformity for up to 90 days. It maximises surfactant molecule output, providing consistent management of water repellency. | 25-50L |
| HydroForce Inject Surfactant | Proprietary Blend of Non-ionic Surfactants | 20L, 200, 1000L | HydroForce Inject is a high quality thatch and soil penetrant surfactant blend, specifically designed to quickly and efficiently move water away from the foliage and thatch and into the growing medium. HydroForce Inject is economical and ideal for injection into irrigation systems or application via boom sprayer for large area usage. | 2-5L 10-20L per megalitre of Irrigation Water |
| HydroForce Rapid Surfactant | 400g/L Non-ionic Surfactant Blend | 20L, 200L, 1000L | HydroForce Rapid is a versatile surfactant formulation which can offer multiple functions in improving water availability in turf management. At lower rates of application, HydroForce Rapid can act as concentrated, high quality thatch and soil penetrant, designed to quickly and efficiently move water away from the foliage and thatch and into the growing medium. When used at higher rates of application, HydroForce Rapid offers a medium term residual soil surfactant option, providing up to 6-8 weeks performance. | 20-50L |
| HydroForce Recharge Surfactant | 800g/L Non-ionic Surfactant Blend | 20L | HydroForce Recharge is a premium soil surfactant blend, specifically designed to prevent and overcome hydrophobic soil situations and improve water management processes within the turf and plant growing environment. HydroForce Recharge's key performance characteristics are due to it's unique combination of powerful, highest quality surfactant technologies fulfilling rapid soil wetting, extended residual and reliable re-wetting and moisture retention performance. | 5-50L |

SPRAY ADJUVANTS

| Product | Active Ingredients | Formulation | Pack Size | Rate |
|--|---|--------------------------|---------------|-----------------------------|
| Foam Aid Foam Suppressant | Dimethylpolysiloxane | Suspension Concentrate | 1L | 20-60mL per 100L |
| Indigo Blue Liquid Marking Dye | 90g/L Sulphonated Aromatic Dye | Liquid | 5L, 20L, 200L | 100mL per 100L of water |
| Octane Non-Ionic Extender, Sticker, Spreader | 859g/L di-1-p-menthene | Emulsifiable Concentrate | 5L | 300mL-1.2L per hectare |
| Odour Aid | Methyl Salicylate | Liquid | 1L | 130mL per 100L of water |
| Monterey Surfactant | 350g/L Soyal Phospholipids, 350g/L Propionic Acid | Emulsifiable Concentrate | 1L, 5L, 10L | 100-500mL per 100L of water |
| Scrubwet Penetrant Surfactant | 1020g/L Polyether modified polysiloxane | Suspension Concentrate | 5L, 20L | 30-200mL per 100L of water |
| Voltage MSO Spray Adjuvant | 700g/L Ethyl and Methyl Esters of Vegetable Oil, 116g/L Non-ionic Surfactants | Soluble Concentrate | 20L | 500mL-1L per 100L of water |

ADJUVANT ACTIVITY GUIDE

| Product | Acidifier (Alkaline Hydrolysis) | Antifoam | Deposition (Stick) | Drift | Droplet Lifetime Management | Penetrant | Spreader | Protection from UV & Wind | Water Conditioner | Aquatically Approved | Comments |
|--|---------------------------------|----------|--------------------|-------|-----------------------------|-----------|----------|---------------------------|-------------------|----------------------|---|
| Polymer Forming Compounds (OCTANE [^]) | | | • | • | • | •* | • | • | | | Excellent turf safety. Extends contact insecticide & fungicide performance. |
| Non-ionic Surfactants (OPTI-SPREAD 1000 [^]) | | | • | | | | • | | | | |
| Organosilicones (SCRUBWET [^]) | | | • | | | •# | • | | | | Super spreaders. Best for woody weed control. |
| Crop Oil Concentrates (OVERTAKE OIL [^]) | | | • | • | • | • | • | | | | Useful addition for non-selective herbicides. |
| Vegetable Oil Concentrates (VOLTAGE MSO [^]) | | | • | | • | • | • | | | | Use lower rate in high temperatures. |
| Soyal Phospholipids, Propionic Acid (MONTEREY [^]) | • | | • | • | | •* | • | | | • | Not all product needs acidification. Check Monterey product guide. |
| Ammonium Sulphate | | | | | | | | | • | | Overcomes water hardness and may assist in uptake. |
| Defoamers (FOAM AID [^]) | | • | | | | | | | | | Reduces foaming in spray tank. Low rates of application required. |

[^] Octane Sticker, Extender, Spreader. ProForce Scrubwet Penetrant Surfactant. ProForce Monterey Surfactant. Voltage MSO Spray Adjuvant. Overtake Oil. Foam Aid Foam Suppressant. Opti-Spread 1000 Non-ionic Surfactant.

* Passive movement into the plant. Soft on plant's cuticle, as a result of organic foundations.

Forced movement into plant. Best for use in total weed control.

ProForce is a registered trademark of Indigo Specialty Products Pty Ltd.

AQUATIC MANAGEMENT

| Product | Active Ingredients | Formulation | Pack Size | Purpose | Rate |
|----------------------------|--|-----------------------|------------------------|--|---|
| AgriTec Aquatic Algaecide | 226g/L Copper Sulphate Pentahydrate Soluble | Concentrate | 5L, 15L, 200L | Self Dispersing Aquatic Algaecide | 0.2-1.0mg/L |
| Bio-Blast WSP | Microbial blend containing 5 billion CFU/gram bacteria | Water Soluble Packets | 1.38kg (12 x 115g WSP) | Improves clarity & odour and ties up nutrients within water to assist in the prevention of algal growth. | Use 1 water soluble packet per 450,000L of water |
| Bio-Blast Aqua Pucks | 10 x 107 of 8 strains of aerobic and facultative beneficial bacteria | Pucks | 816g (12 x 68g Pucks) | Degradation of organic debris, odours, and sediment in ponds, lakes and open water bodies. | Use 6-12 Aqua Pucks per 1,000,000 Litres of water |
| Monterey Surfactant | 350g/L Soyal Phospholipids, 350g/L Propionic Acid | Soluble Concentrate | 1L, 5L, 20L | Aquatically approved Surfactant & Acidifier | 100-500mL/100L of water |
| Rapid Fire 800SG Herbicide | 800g/kg Glyphosate (Aquatically approved) | Soluble Granule | 10kg | Aquatically Approved Knockdown Herbicide | Boom: 0.7-4kg Handgun: 250-700g/100L |
| Rapid Fire 510SL Herbicide | 510g/L Glyphosate (Aquatically approved) | Aqueous Concentrate | 20L | Aquatically Approved Knockdown Herbicide | Boom: 1.3-6.3L/ha Handgun: 350mL-1.3L/100L |

About Us

Indigo Specialty Products is a privately-owned business, formed and operated by a small team of industry professionals with extensive experience in manufacture, distribution, development and product registration. We are a business focused on production & supply of plant protection, pest control, plant nutrition, soil, water management & biological products. Specialising in Australasian non-crop and niche horticultural markets, including Turf & Amenity, Nursery Production, Industrial Vegetation Management, Forestry, Pest Control and Consumer Home Garden & Pest Management.

Formulated in Australia

Our goal is to manufacture the Indigo product ranges in Australia as much as possible, where we can oversee product quality processes, whilst allowing us the flexibility to modify products to overcome ever changing challenges. Our ProForce and HydroForce range of products are formulated in Australia using imported materials. Our Xcel Fertiliser and BioForce Biological range are manufactured in Australia to the highest possible standards.

Focused on specialty markets

We strive to be relevant in our core markets, by adding value via overcoming issues and obstacles that are present in the markets we operate within. We do this by focusing on control of key pests or diseases or by solving key management issues that our valued end user customers have. We also strive to be active in the core markets in which we operate by working closely with our allied distributor network, offering support, service and advice where required.

Developed & researched for local conditions

We are heavily focused on local research and development to ensure our products perform at their peak in the Australian markets. We actively invest in field trial research programs and modify our formulations to match the local conditions of the key markets in which we operate to maximise performance.

Diagnostic services

We offer a complete diagnostic services package, known as TechForce, designed to evaluate and identify key agronomic problems, so we can be better informed in recommending products for the specific situation. We also believe that by offering these services, our customers and users of our products can evaluate performance of the portfolio in a quantifiable and scientific approach. We use some of Australia's leading laboratories in delivering results for our services including: Westgate Labs, Department of Primary Industries and Tweed Laboratories.
